

Hello Mentor and Team,

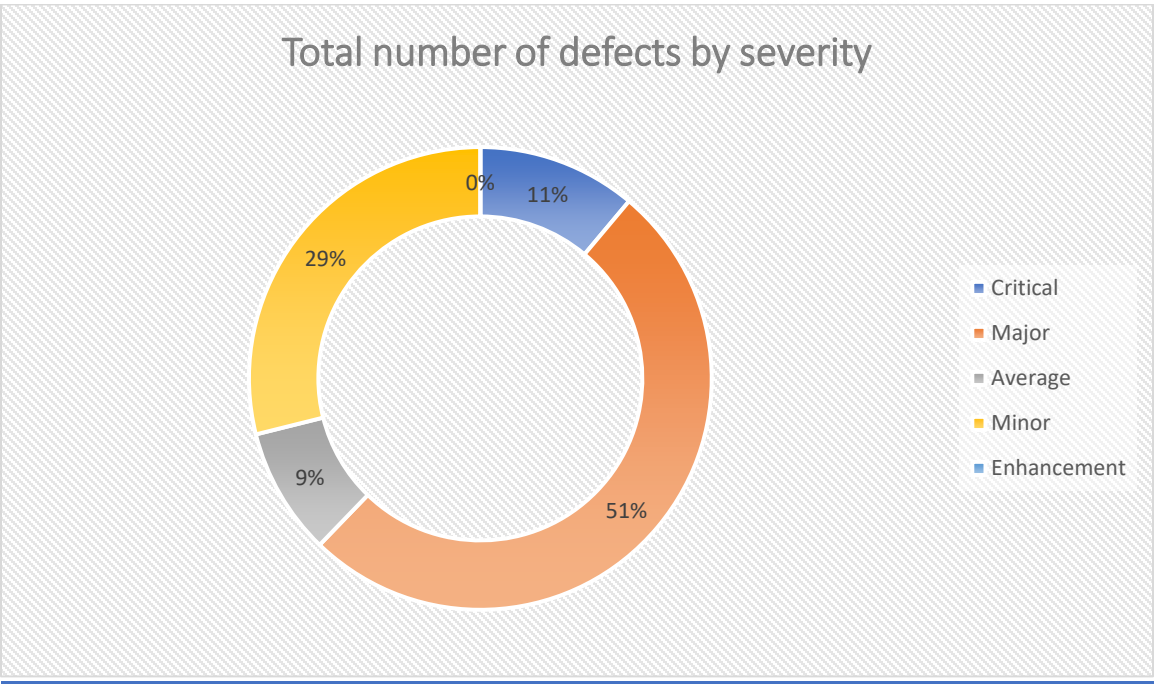

Please find below the QA report for the GregOlsen.PhotoStudio project.

Project Name	Greg.Olsen
Build Number	1.0
Test Type	Full Testing
Project link	https://photostudio.demohoster.com/

General Quality Analysis :

The overall quality of the application can be estimated as Low. The total number of defects is 45. Functional defects are present, including several issues that affect core functionality.The majority of defects are related to key modules such as Gallery, Sessions, and Payment. Critical issues like Motion Gallery not opening, Payment page not loading, and incorrect payment calculations in Sessions significantly impact the user experience.A detailed quality analysis is presented below.

Detailed Quality Analysis

The pie chart represents the distribution of reported defects based on severity levels. The majority of issues fall under the **Major (51%)** category, indicating significant functional and UI problems affecting system behavior. **Minor (29%)**, **Critical (11%)**, and **Average (9%)** defects also contribute to the overall quality concerns but have less impact on core functionality.

Smoke Testing- Unacceptable

Reason:

- Search functionality is not responding (QATC-989040)
- Motion page does not open (QATC-988937)
- Pricing and booking flow issues exist (QATC-989962, 989599)

These issues affect key application workflows such as navigation, booking, and content access, making the build unstable for further testing.

Defect Validation:

Total number of Defects: 45

Rejected Defects: 7

Not Rejected Defects: 38

$$\text{Reject Rate} = \frac{7}{45} \times 100$$

≈ 15.56%

DV Quality = Medium (below 20%)

Detailed Quality Analysis

<u>Module</u>	<u>Quality</u>	<u>Contents</u>
Home	High	Header and basic contact info issues affect UI consistency. Phone number mismatch (QATC-989281) and persistent header highlight issue (QATC-989294) reduce reliability of navigation experience.
Work (Portrait,Lifestyle,Travel,Motion + Search behavior)	Low	Major functional and UI issues across galleries. Missing navigation, broken previews, wrong images, and display inconsistencies. Key bugs include: QATC-988937, 989615, 989549, 989323, 989310, 989304, 989297, 988993, 988992, 988941. Also includes search

		failure and incorrect behavior impacting user flow.
Session (Book Session, Book Info, Payment)	Low	Critical pricing and booking flow issues make this module unstable. Incorrect pricing (QATC-989962, 989599), missing pages (QATC-988991), incorrect form behavior (QATC-989941, 989933, 989928), and wrong page title (QATC-989951) severely impact usability and business logic.
Connect (Contact + Communication features)	Medium	Multiple validation and UI inconsistencies reduce usability. Missing footer (QATC-989894), broken validation logic (QATC-989905, 989898, 988984), inconsistent button styling (QATC-989910), and session menu missing
Clients	Medium	Significant data integrity and UI alignment issues. Missing clients (QATC-988337, 988956), wrong ordering (QATC-989559), swapped images (QATC-989333), spacing issues (QATC-989525), broken links (QATC-989576, 989914), and image display errors (QATC-989340, 989954).
Bio & Press	Low	Content is incomplete and missing key information. Missing biography details, images, and press content (QATC-988953, 988951, 988949, 988948, 988946). This reduces credibility of the section.

Test Environment:

OS: Windows 11 (64-bit)

Browser: Google Chrome (Version 147.0.7727.56)

Recommendations:

- Motion Gallery page is blocked and not opening.
- Payment page is not loading.
- In Sessions, payment calculations are incorrect.
- These issues are critical and should be fixed with high priority.
